

62.17

Or

- #V-81 VANDA DEAREI X V. MERRILLII X V. MANILA - Medium sized, well formed round and heavy green to pink flowers in clusters; dotted russet brown. Long lasting, nearly always in spike, one starting as another fades.
- #175 C. GREEN GOLD X C. BICOLOR - Small, heavy green flowers with red-purple Isthmus-type lips. Three to eight blooms per stem when mature.
- #177 C. GRANULOSA, SCHOFIELDIANA X SELF - So many who saw this in bloom, with its cluster of waxy 5-inch solid green flowers and purple lips, have begged for a division that we "selfed" it and are producing seedlings.
- #186 B. DIGBYANA X SELF - The same is true of this "Mother of Brassos" - everyone wanting divisions, and so few divisions available. The long, hairlike fringe on the big, green-throated lip make it an attractive addition to any collection that lacks this fine species.
- #187 C. HARRISONIANA X C. FABIA - Expect this to produce 5-inch to 6-inch heavy well rounded pink blooms with lots of clear yellow in lip and throat.
- #188 C. UNDINE, AQUINAE (C. Intermedia, Aquinae X C. Mossiae, Rein.) The WCL form of small, heavy Undine. Some may have tinge of pink in petals.
- #840 C. ELEANORE ALBA X LC JAY MARKELL - Fine White-Colored-Lip blooms for Spring, Summer or twice yearly.
- #850 LC TRIGLAV X POTINARA ANISE - Well formed open and heavy blooms with light to medium rose petals and sepals and brilliant red-purple lips.
- #859 C. TRIANAE, CLINKABERRYANUM X C. HYBRIDA - To produce clusters of 5 to 6-inch heavy pink blooms, dotted red, with purple lips.
- #868 C. GRANULOSA X C. HAROLD X LC MEDON X BC MRS. J. LEEMAN - Expect wide range of chartreuse to yellow blooms. Some with Isthmus-type lips; some with pink-fringed Brasso-type lips. Should bloom twice yearly.
- #870 LC LUDGATE X LC THURDERNIANA - Good percentage of these should be fine YELLOWS; the rest richly colored in red tones. Fall.
- #871 C. FLORENCE PATTERSON X C. JEAN FAIRCLOTH MC ARTHUR - Fine, big, heavy-textured Pure White flowers with lots of gold in throats. Twice yearly production, Winter-Summer.

ANY INDIVIDUAL 2-flask PACKET OF UNTREATED* SEED.....\$5.00
THREE OR MORE 2-flask PACKETS OF UNTREATED* SEED....\$3.50 per packet.

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA. DATE _____

Please fly me the following 2-flask packets of UNTREATED* ORCHID SEED, which I am ordering from your 1956 Page 1:

"WHAT WILL ATOMIC AGE ORCHIDS BE?"

If you don't have a copy of this circular, ask for it.

- 49-81 VANDA DEAREI X V. MERRILLII X V. MAWII - Medium sized, well formed round and heavy green to pink flowers in clusters; dotted rust brown, long lasting, nearly always in spike, one starting as another fades.
- 49-82 C. GREEN GOLD X C. BICOLOR - Small, heavy green flowers with red-purple labellum-type lips. Three to eight blooms per stem when mature.
- 49-83 C. GEMINOSA, SCHONIMILLIANA X SELF - So many who saw this in bloom, with its cluster of waxy 2-inch solid green flowers and purple lips, have begged for a division that we "sailed" it and are producing seedlings.
- 49-84 E. BIGEYANA X SELF - The same is true of this "Mother of Broom" - everyone wanting divisions, and so few divisions available. The long, delicate fringes on the big, green-bordered lip make it an attractive addition to any collection that lacks this fine species.
- 49-85 C. HARRISONIANA X C. FALSA - Expect this to produce 2-inch to 2-1/2 inch heavy well rounded pink blooms with lots of clear yellow in lip and throat.
- 49-86 C. UNDAINE, AQUINAE (C. INTERMEDIATA, AQUINAE X C. UNDAINE, MAWII) - The form of small, heavy undine. Some may have fringe of pink in petals.
- 49-87 C. ELEANORE ALBA X IC JAY MAREKILL - Fine White-Colored-lip blooms for spring, summer or twice yearly.
- 49-88 IC TRIGLIA X POTINARA ANISE - Well formed open and heavy bloom with light to medium rose petals and sepals and brilliant red-purple lips.
- 49-89 C. THINAE, CLIMACERARIANA X C. HYBRIDA - To produce clusters of 5 to 6 inch heavy pink blooms, dotted red, with purple lips.
- 49-90 C. GEMINOSA X C. HAROLD X IC MENDON X BC MRS. J. L. LEMAN - Expect wide range of changes to yellow blooms. Some with labellum-type lips; some with pink-fringed brass-type lips. Should bloom twice yearly.
- 49-91 IC LUDGATE X IC THUNDERBOLTA - Good percentage of those should be fine YELLOWS; the rest richly colored in red and rose. Fall.
- 49-92 C. ELEANORE PATTERSON X C. JEAN FAIRCHILD MC ANTHUR - Fine, big, heavy-featured pure white flowers with lots of gold in throat. Twice yearly production, Winter-Summer.

ANY INDIVIDUAL 2-PACK PACKET OF UNTREATED SEEDS.....\$1.00
THREE OR MORE 2-PACK PACKETS OF UNTREATED SEEDS.....\$3.50 per packet.
